

V130

PTFE JOINTING TAPE

Features

V130 is versatile because of its capabilities to handle all liquid and gases. . V130 is ideally suited for:

- Flanges
- Ducts
- Tanks
- Evaporators
- Pump cases
- Digesters
- Transmission cases
- Compressor housings
- Drum lids
- Portholes
- Man ways
- Towers
- Glass joints
- Heat exchangers
- Sight glasses

PRESSURE
300 psi
TEMPERATURE
-200°C + 600°C in air
pH VALUE
0 - 14

Design Description

V130 is a non-toxic, non-contaminating PTFE jointing tape. It has a sticky back for ease of installation and removal which saves labour in cleaning and machining. It is tough but gentle making it useful in high pressure steam joints and fragile glass joints the same.

Coming in various widths, thickness and lengths . It is suitable for both critical and general service. Its limitations are that of free fluorine and temperature in excess of 260°C.
